

Fix for Generic to prevent issue when adding relationships outside of an app

Application	Version	Version Date	Status of App	Update Type	Description of Update	Essential/Optional	Details of Update	ScripterName
Generic	2.34	20/12/2021	Updates Applied	Fix	Adding relationships outside of app	Essential	Issue found when adding Executors, Beneficiaries etc on a matter where they have already added relationships outside of the probate app. The RelationshipADD script was correctly bypassing the DBRelationshipAdd card, but when you get back to the probate screen, the contact details were not copied in. The script has been updated to accommodate this situation and resolve it	Abi Barbour

Probate fixes

App	Version	Version Date	Status of App	Update Type	Description of Update	Essential/Optional	Details of Update	ScripterName
Probate	3.13	20/12/2021	Updates Applied	Fix	Fixes to PA1A/PA1P, IHT400complete and RelationshipAdd	Essential	<p>" PA1A & PA1P prescripts - bugs fixed and postcode coding updated to remove spaces so all postcodes will fit on the forms.</p> <p>" Iht400complete - script that produces the Laserform IHT400 updated as IHT404 schedule was not including Income accrued to date of death and IHT406 schedule was repeating first 3 Premium Bond assets instead of displaying 6</p> <p>" RelationshipADD - updated to collect contactentity variable when the relationship already exists, having been added outside of the app, so that details are fed into the probate app screens (this has also been updated in Generic and will fix the same issue in LPA and probably other apps too)</p>	Abi Barbour
